www.penciltopics.co.uk web site

Lyra Polychromos share a number of names of colours and reference numbers with Faber-Castell Polychromos. This is not because there is any link between the Companies, merely that some years ago the two firms tried to establish a uniform reference system which was not taken up by other brands

INSTRUCTIONS FOR USE OF COMPARISON CHARTS

Print this page on to cartridge paper on the best print setting you have, and then cut out each of the three charts closely to the colour strip so that you are able to place the colour edge directly against the colours on another chart. Find the nearest match.

Accuracy will depend upon the accuracy of your printer, but all the charts are scanned and adjusted to identical settings so any variation in colour will apply equally to all the charts. If you wish to check the accuracy, download a blank chart and fill in samples of a brand you have and compare with the appropriate chart
