

JUDITH CROWN LIGHTFASTNESS TESTS

The test results below are taken from the www.penciltopics.co.uk website and were posted there as a service to Coloured Pencil users.

The tests were not scientifically prepared but simply involved the preparation of three identical test strips of each colour taken from the Coloured pencils which were available to Judith.

The strips were separated into the first sample which was stored in a dark place (the control),

The third sample was sprayed with Winsor & Newton Fixative to provide some Ultra Violet protection and then the second and third samples were exposed to sunlight in Israel over 12 weeks during the summer.

As expected the unfixed sample suffered more fading. The tests were completed over several years and the sunlight was not uniform. The strips below are in the order : Control/unfixed/fixed

The images below may be used for reference purposes but if they are reposted on a website, a link

should also be made back to www.penciltopics.co.uk the original source and the source acknowledged.
